

Brilliance SERIES

METAL MOUNTED LUMINOUS PRINTS

Our Brilliance prints differ from traditional dye-sublimated metal prints in a dramatic way. With Brilliance, the luminous base tone and wide color gamut along with the high-gloss surface guarantees luxurious extra-rich colors with a perfect gray balance.

We use a 7-mil polyester-based silver halide material to create stunning gallery-level color prints that takes prints on metal to the next level.

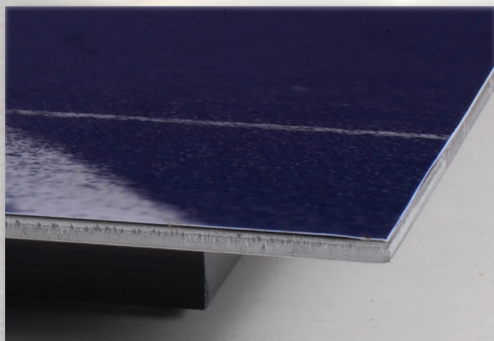

- Images are printed on a unique photographic polyester material, not dye-sublimated to metal
- High gloss finish adds unparalleled richness and depth
- Impressive color range and integrity
- Deeper blacks and more brilliant whites
- Greater shadow detail
- Incredible sharpness
- Bright white point brings out true-to-life colors
- Accurately displays skin tones
- Ultra-smooth surface
- Ideal for portraits, landscapes or commercial projects
- Mounted on 1/8" aluminum composite material-prevents bowing
- Light weight, yet rigid
- Prices competitive with traditional dye-sub metal prints

Standard presentation includes an inset black 3/4" aluminum back frame but other options are available. (easels, flat plate, standoffs, floater frame, float block).

Elegant Black Back Finish and Black Aluminum Metal Frame

Aluminum Composite, bow-free
